

Brainstorming & Idea Prioritization Template

Date	15 July 2026
Team ID	SWTID-2026-6128
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Swathi Polavaram	Use dual models (BiLSTM + BERT) together so predictions are cross-checked for higher confidence, and integrate Gemini AI to generate natural, personalized guidance.	Model Architecture / AI Response Generation	1
2	Moravaneni Aiswarya Lakshmi	Detect mixed / secondary emotions (e.g., Confused + Curious) instead of a single label, and build a Streamlit analytics dashboard to visualize emotion trends and model confidence.	Model Architecture / Analytics & Visualization	2
3	Gutha Ramakrishna	Log every interaction (input, emotion, confidence, response) to CSV for later analysis, and add an offline fallback response mode in case the Gemini API is unavailable.	Data Logging / Reliability	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Dual-model (BiLSTM + BERT) emotion detection with Gemini-powered personalized guidance	High	High	1	Yes
2	Mixed-emotion detection with a Plotly-based analytics dashboard for emotion and confidence trends	High	Medium	2	Yes
3	CSV interaction logging with an offline fallback handler for reliability	High	Medium	3	Yes
