

Project Initialization and Planning Phase

Date	15 July 2026
Team ID	SWTID-2026-6128
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student struggling silently with a difficult concept in a self-paced online course.	Get quick, empathetic guidance without waiting on an instructor's reply.	Manually explaining my confusion in a forum post feels slow and often goes unanswered.	There is no way for the platform to sense my frustration or confusion from what I type.	Discouraged and hesitant to keep asking for help.
PS-2	A teaching assistant handling dozens of student messages every week.	Quickly identify which students are frustrated or confused so I can prioritize my replies.	Manually reading tone and guessing each student's emotion from text takes significant time.	There is no automated way to classify a student's emotional state from their message.	Overwhelmed, and worried that struggling students are being missed.
