

Project Phase-II
CUSTOMER JOURNEY MAP

Date	15 July 2026
Team ID	SWTID-2026-6128
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	4 Marks

Customer Journey Map – Emotion Detection & Learning Support Engine

Primary Persona: Student / Learner

Project Context: AI-powered learning platform that detects user emotions from text and provides empathetic, adaptive learning support using NLP and Machine Learning.

Journey Stages Overview

Stage User (Learner) Touchpoints Experience Pain Points Goal Opportunities for Improvement

1. Start Learning / Ask Question

- User Action: Learner logs into platform and asks a doubt or starts learning session
- Touchpoints: Chat interface, LMS platform, AI chatbot
- Experience: Curious, sometimes confused or anxious
- Pain Points: Difficulty expressing doubts clearly, fear of judgment, lack of clarity in system response
- Goal: Get instant help and understanding
- Opportunities:
 - Natural language chat support
 - Emotion-aware input detection
 - Friendly onboarding messages

2. Express Confusion / Problem-Solving

- User Action: Learner asks questions like “I don’t understand this topic”
- Touchpoints: Chatbot, AI assistant, help center
- Experience: Frustrated, confused, or stressed
- Pain Points: Generic responses, no emotional understanding, repeated explanations
- Goal: Clear explanation and emotional reassurance
- Opportunities:
 - Detect confusion/frustration using NLP
 - Provide simplified explanations
 - Add supportive responses like “It’s okay, let’s go step by step”

3. Learning Interaction

- User Action: Continues learning and interacts with system frequently
- Touchpoints: AI tutor, recommendation system, learning modules
- Experience: Engaged but sometimes overwhelmed
- Pain Points: No adaptive learning path, lack of motivation support
- Goal: Smooth learning experience with guidance
- Opportunities:
 - Adaptive content based on emotional state
 - Motivational feedback when stress is detected
 - Personalized learning suggestions

4. Assessment / Performance Stage

- User Action: Takes quizzes or submits assignments
- Touchpoints: Assessment system, feedback dashboard
- Experience: Nervous, pressured, or motivated
- Pain Points: Fear of failure, lack of emotional encouragement, unclear feedback
- Goal: Understand performance and improve
- Opportunities:
 - Emotion-based feedback generation
 - Encouraging messages for low scores
 - Positive reinforcement for improvement

5. Progress & Learning Growth

- User Action: Tracks learning progress over time
- Touchpoints: Dashboard, analytics, progress tracker
- Experience: Motivated if improving, discouraged if not
- Pain Points: No emotional tracking of learning journey, lack of motivation during dips
- Goal: Continuous improvement and motivation
- Opportunities:
 - Emotion trend tracking
 - Personalized encouragement system
 - Smart recommendations for weak areas

6. Continued Engagement / Retention

- User Action: Returns regularly or drops off depending on experience
- Touchpoints: Notifications, chatbot reminders, learning app
- Experience: Loyal if supported, disengaged if ignored
- Pain Points: Lack of emotional connection, repetitive content
- Goal: Stay motivated and consistent
- Opportunities:
 - Emotion-based reminders
 - Gamification and rewards
 - Empathetic engagement messages

Stage	Employee Goal	Touchpoints	Experience	Pain Points	Opportunities for Improvement
	complete all formalities	checklist, e-signature tools		unclear next steps	flow, welcome dashboard
1. Engage	Access resources, manage leave, and stay informed	Self-service portal, time tracking, HR comms	Confident and self-reliant	Hard-to-navigate systems	Centralized HR services, mobile access
2. Develop	Improve skills through training and learning	Learning modules, skill assessments, mentorship tools	Eager to grow but needs direction	No training calendar or tracking	LMS integration, personalized learning paths
3. Progress	Advance career, receive feedback and recognition	Performance reviews, goal-setting tools	Motivated but seeks transparency	Irregular reviews, unclear metrics	360° feedback, progress dashboards
4. Exit	Leave the organization smoothly	Exit checklist, feedback survey, document handover	Wants closure and clarity	Delayed exit clearance, no feedback loop	Automated offboarding, exit analytics
